85 g

1.5 kg and 5 kg

KEY  
BENEFITS

### Moderate amount of high quality protein

to support renal function from the early stages and help maintain an adequate muscle mass

### Early restricted level of phosphorus

to help slow the progression of chronic renal insufficiency

### With restricted level of phosphorus and added omega-3 fatty acids, potassium and antioxidants

to help assist with early kidney care

ADDITIONAL BENEFITS  
& CHARACTERISTICS

**Specifically formulated to meet the needs of cats with early stages of CRI**

**High palatability for good acceptance**

**Dietary phosphorus restriction**

to help slow the progression of CRI and minimise the risk of secondary nutritional hyperparathyroidism

**Added potassium**

to help reduce the risk of hypokalemia in CRI

**Helps reduce the recurrence of uroliths (calcium oxalate) requiring urine alkalization**

**Minimizes formation of toxic uraemic compounds**

by providing a moderate amount of amino acids

**May help to reduce glomerular hypertension and inflammation**

thanks to omega-3 fatty acids

**Added B-complex vitamins**

to compensate loss through polyuria linked with CRI

**Sources of fibre to promote good faecal consistency in cats with CRI**

## FEEDING GUIDELINES

The recommended period of use is initially up to 6 months. A gradual transition to a new diet may be especially helpful in cats with CRI. Cats with CRI that remain inappetent or anorexic cats should be assessed for nausea and uraemic gastritis. Warming the product to room temperature can enhance palatability for cats with a fussy appetite.
